

ISO SPEED COLD

High-performance freezer door
For cold storage and freezer applications

Iso Speed Cold

Cold storage and freezer door

The Iso Speed Cold with its 100 mm (3.9") thick sections include thermal breaks and offer excellent insulation with a U-value of 0.50 W/(m²K)*. Two track configurations are available for refrigerated and cold storage applications. The sections are Stucco-textured on the interior and exterior, in gray and white based on RAL 9002. Optional RAL colors are available to match any design requirements.

* consult factory for door sizes

Temperature ranges based on door mounting

V - Installation side: Maximum -18° F. Opposite side: Maximum -18° F
 H - Installation side: Maximum >32° F. Opposite side: Maximum -18° F

The robust 3.9" (100 mm) thick sections are highly insulated and are available in 200 different RAL colors.

Heat is an option

For safe and reliable operation

- Heated side elements and bottom plate
- Heated operator
- Heated control housing
- Heated sealing frame

Possible fitting types in the temperature ranges:

H and V track applications

Track application V

Application options:

- Exterior door for cold storage warehouses, dock doors
- Use in in-house logistics for production and distribution
- Special solutions for conveyor technology
- Use in transitions with high temperature differences - e.g. pre-cooler area before the deep-freeze area
- Intelligent solution for use in deep freeze areas, replaces sliding door combined with a plastic door

Equipment features

Iso speed cold high-performance freezer doors

Door Model	Iso Speed Cold V	Iso Speed Cold H
Track Configuration	V (vertical-lift)	H (high-lift)

Heat package 230 v, 1-phase	●	●
Emergency opening		
Manual chain hoist	●	●
Safety features - built in light grid	●	●

● = Standard
○ = Optional
- = Unavailable

* Factory recommends an on-site floor heating system in the area of the bottom seal to prevent it from potentially freezing to the floor.

Warranty

The springless design enables us to include our 5 and 2 warranty, ensuring reliable and dependable operation with:

- 5 years or 1,000,000 cycles on operators with VFD
- 2 years on all other mechanical components
- 2 years on electrical components
