Title: Hörmann’s Showcases New Products Now Available Coast to Coast at 2024 NAHB International Builders Show

Hörmann North America will showcase two new residential garage door models that are now available coast to coast, at the NAHB International Builders Show, February 27 – 29 in Las Vegas, Booth C2681.

Originally only available for West Coast customers, the Infinity Classic 7800 and the Modern Tech 3550 are available for order from coast to coast in the US and in Canada. A wide array of design variations and features, including new standard finish and glass options meet modern project designs more than ever before.

In addition to the Infinity Classic 7800 and Modern Tech 3550, three additional doors will be displayed at the IBS: a carriage house door – the Therma Style 5500, a polyurethane door – the Clima Tech 4400, and a full view door – the contemporary Modern Classic 7500.

Every displayed residential garage door model includes Hörmann’s latest door technology and quality construction features as standard. For extensive customization specification, Hörmann offers an extensive variety of design options including textured and smooth finishes, a wide array window styles, and the capability of custom colors.

Hörmann entered the North American door market in 2006 with the high-quality residential door technology already known throughout Europe for more than 80 years, which includes innovations such as an exclusive 100 percent CFC & HCFC free polyurethane insulation, FingerGuard™ pinch-resistant panels, and the Galaxy Paint System. Homeowners have access to numerous classic and contemporary garage door styles and options – from value/builder, better, and best levels of thermal rating, customizations, maintenance, and luxury levels, which makes customization easy while maintaining budget.
